

WHAT TO BRING

JOHN COLES FLY FISHING SCHOOL

What to bring on a Guided Fishing trip

Most of the areas where we fish are at a much higher altitude than Sydney. So the weather can change quickly, you should be prepared for all four seasons in one day.

You will need to bring the following:

- Rain gear, not bright colours.
- Clothes to keep you warm in case the weather does become cold, thermal underwear, fleece and beanie.
- A broad brimmed hat and polaroid sunglasses.
- In general, fingers crossed it will be warm so you need a long sleeved shirt and pants, colours that blend you in with the colours of nature. Checks, plaids and camouflage are better than plain colours.
- A change of fishing clothes in case you get wet. Plus something comfortable to change into at night.
- Rods #3 weight - #7 weight are a good range to have depending upon your casting ability.
- Breathable waders are good for the cold days or thigh length wading boots, bring thick socks to wear inside the waders.
- Bring your fly box, most general patterns work in most regions.

NB. Don't worry if you don't have any fishing equipment I can supply the basic equipment and waders in sizes from 6-12

Other things to bring:

- Sunscreen and insect repellent.
- A camera and spare batteries.
- A small torch.
- Ear plugs if you are sharing a room.
- Something to read.
- Any medications you require.

Please call me if you have any questions.
